

Management Objectives for Joint Work on Exide

1. Make improving the public health of community members the central goal of the Exide residential cleanup.
2. Fully integrate federal, state and local resources into the response structure.
3. Minimize social, political and economic adverse impacts to the community.
4. Apply the best available science and technology to the Exide facility and residential cleanups.
5. Keep the impacted communities fully informed about cleanup progress.
6. Ensure the health and safety of all response personnel and impacted community members.
